

BCJ Healthy Living Challenge – Version 5

Website Scoring & Online Participant Tracking Specification

For Website / Online Support Team | 29 August 2026

1. Purpose

This document converts the Version 5 scoring model into a practical website specification. The supplied Healthy Plan PDF provides the 12-week challenge sequence and five daily diet occasions. The point values below are the Version 5 scoring decisions for implementation; they are not point values stated in the PDF.

2. Core Scoring Principle

Item	Rule	Maximum
Active lifestyle challenge	Maximum 10 points per day	10 per active challenge
Diet adherence	5 eating occasions × 2 points	10/day
Daily %	Points earned ÷ available points × 100	100%
Weekly score	Average of daily percentages	100%
Final score	Sum of Week 1–12 weekly percentages	1,200

3. 12-Week Progression

Week	New challenge	Active lifestyle challenges	Diet
1	Drink 2–3 L of water daily (or age-appropriate goal)	1	10/day
2	Hit 8,000–10,000 steps daily	2	10/day
3	No sugary drinks	3	10/day
4	Sleep at least 7–8 hours per night	4	10/day
5	Eat vegetables with every main meal	5	10/day
6	Complete all scheduled workouts	6	10/day
7	No fast food	7	10/day
8	Family activity day	8	10/day
9	10 minutes of daily mindfulness or breathing exercise	9	10/day
10	Cook all meals at home (no food from any restaurant)	10	10/day
11	Limit screen time before bed for better sleep	11	10/day
12	No eating after 8 PM	12	10/day

Maximum daily points: Week 1 = 20; Week 2 = 30; Week 3 = 40; ...; Week 12 = 130.

4. Lifestyle Challenge Scoring

Week	Challenge	Type	Scoring
1	Drink 2–3 L of water daily (or age-appropriate goal)	Quantitative	250 ml = 1 point; cap 10
2	Hit 8,000–10,000 steps daily	Quantitative	1,000 steps = 1 point; cap 10
3	No sugary drinks	Yes/No	Yes = 10; No = 0
4	Sleep at least 7–8 hours per night	Quantitative	1 hour = 1 point; cap 10
5	Eat vegetables with every main meal	Yes/No	Yes = 10; No = 0
6	Complete all scheduled workouts	Yes/No	Yes = 10; No = 0
7	No fast food	Yes/No	Yes = 10; No = 0
8	Family activity day	Yes/No	Yes = 10; No = 0
9	10 minutes of daily mindfulness or breathing exercise	Yes/No	Yes = 10; No = 0
10	Cook all meals at home (no food from any restaurant)	Yes/No	Yes = 10; No = 0
11	Limit screen time before bed for better sleep	Yes/No	Yes = 10; No = 0
12	No eating after 8 PM	Yes/No	Yes = 10; No = 0

5. Diet Adherence – 10 Points Every Day

Diet is a regular daily component, not a bonus or tie-breaker. Each eating occasion is scored separately at 2 points.

Eating occasion	Points	Website input
Breakfast	2	Yes / No
Mid-morning	2	Yes / No
Lunch	2	Yes / No
Evening snack	2	Yes / No
Dinner	2	Yes / No
TOTAL	10	Automatic

Example: Breakfast Yes, Mid-morning No, Lunch Yes, Evening snack Yes, Dinner Yes = 8/10 diet points.

A diet occasion earns its 2 points only when the participant follows the approved diet plan for that occasion. BCJ should approve the exact compliance definition before launch.

6. Diet Categories

The supplied PDF shows diet plans for Kids (10–17 Years), 50–60 kg, 60–75 kg, 75–90 kg, and 90 kg and above. The five scoring occasions remain the same; food and portion guidance differ by category. The website should assign the approved category at registration and display the relevant plan.

7. Participant Website Screen

- Participant profile and approved diet category
- Current week and all active challenges
- Water, steps and sleep numeric inputs
- Yes/No controls for behavioural challenges
- Five separate diet controls: Breakfast, Mid-morning, Lunch, Evening snack, Dinner
- Automatic Daily Score, Maximum Available and Daily %
- Controlled editing and audit trail

8. Daily Calculation Logic

Determine week 1–12.

Activate all challenges up to that week.

Add diet adherence (always active; maximum 10).

Calculate each active challenge.

Calculate maximum available points.

Daily % = $\text{earned} \div \text{available} \times 100$.

Store result and audit any changes.

9. Examples

Week	Lifestyle max	Diet max	Total max	Example
1	10	10	20	Water 8 + Diet 10 = 18/20 = 90%
2	20	10	30	Water 8 + Steps 7 + Diet 8 = 23/30 = 76.7%
3	30	10	40	Water 10 + Steps 8 + No sugary drinks 10 + Diet 8 = 36/40 = 90%
12	120	10	130	All 12 lifestyle challenges + Diet = 130/day

10. Weekly & Final Scoring

Weekly score = average of daily percentages. Final score = sum of the 12 weekly percentages, maximum 1,200. This normalization prevents later weeks from becoming automatically more valuable because more challenges are active.

Recommended fairness rule: create a record for every scheduled day. If required data is not submitted by the deadline, record 0% rather than silently excluding the day. This is a recommended implementation rule and should be approved before launch.

11. Leaderboard

- Primary ranking: Final Score, highest to lowest.
- Show rank, approved display name, final score and final percentage.
- Diet adherence is already included in the score and is not a separate bonus or tie-breaker.
- If a tie-break rule is required, approve it before launch and do not change it during the competition.

12. Admin / Anti-Manipulation Controls

- Unique participant ID and one daily record per participant/date.
- Prevent duplicate submissions.
- Validate numeric inputs as non-negative.
- Store scoring calculations server-side; do not trust browser-calculated scores.
- Keep audit history of edits: user, timestamp, old value, new value.
- Define submission deadline and correction window.
- Allow admin export of daily, weekly and final results.

13. Key Data Fields

Field	Example	Rule
participant_id	BCJ0001	Unique
date	2026-09-01	One record per participant/date
week	1	Derived from challenge start date
water_litres	2.5	Numeric, non-negative
steps	8500	Integer, non-negative
sleep_hours	7.5	Numeric, non-negative
behaviour fields	Yes / No	Controlled values
breakfast / mid_morning / lunch / evening_snack / dinner	Yes / No	2 points each
daily_points / max_points / daily_percentage	18 / 20 / 90	Server-calculated

14. Quick Developer Summary

Week 1 activates Challenge 1; Week 2 activates Challenges 1–2; ...; Week 12 activates Challenges 1–12. Diet is always active and consists of five Yes/No fields worth 2 points each. Quantitative challenges are capped at 10. Yes/No challenges are 10 or 0. Daily % = earned/max × 100. Weekly % = average of daily %. Final score = sum of 12 weekly percentages (maximum 1,200). Leaderboard ranks by final score.
