

90 DAYS OF TRANSFORMATION

HEALTHY LIFESTYLE CHALLENGE

Small habits. Consistent action. A healthier life.

NOT A DIET. NOT AN EXTREME FITNESS PROGRAM.
A practical journey to build healthy habits for life.

PARTICIPANT HANDBOOK • 12-WEEK JOURNEY

WELCOME TO THE CHALLENGE

Dear BCJ Member,

السلام عليكم

Welcome to the BCJ 90 Days of Transformation - Healthy Lifestyle Challenge. This journey is designed to help us become more conscious of our everyday choices and gradually build habits that support better physical, mental, social and spiritual wellbeing.

The objective is not simply to lose weight. It is to learn how to live better - through hydration, movement, home-prepared food, balanced eating, good sleep, reduced sugar, mindful use of screens, reflection and consistency.

**SUCCESS IS NOT MEASURED ONLY BY KILOGRAMS LOST.
SUCCESS IS MEASURED BY HEALTHY HABITS GAINED.**

How to use this booklet

- Follow the weekly challenge and continue useful habits from earlier weeks.
- Use the trackers to focus on consistency, not perfection.
- Record your Day every day.
- Use the food and calorie guide for awareness - not obsessive counting.
- Encourage your family. Healthy habits become easier when practice together.

Healthy Lifestyle – A Beautiful Teaching of Islam

Islam is a complete way of life. Its guidance encompasses every aspect of our lives, including our physical, mental and spiritual well-being. The teachings of our beloved Prophet Muhammad ﷺ encourage us to adopt habits that promote a healthy, balanced and disciplined lifestyle.

One of the beautiful examples is the five daily prayers. Offering Salah five times a day gives us regular breaks from our daily routine, encourages movement, discipline and mindfulness, and provides an opportunity to refresh both our body and soul. Similarly, making Wudu several times a day promotes cleanliness and refreshment. These acts of worship remind us that Islam places great importance on both spiritual and physical well-being.

Islam also provides beautiful guidance regarding our food habits and moderation. Allah says:

“Eat and drink, but do not be excessive. Indeed, He does not like those who commit excess.” (Qur’an 7:31)

Our beloved Prophet Muhammad ﷺ also taught us the importance of moderation in eating:

“The son of Adam fills no vessel worse than his stomach. It is sufficient for the son of Adam to eat a few mouthfuls that keep his back straight. If he must eat more, then one-third for his food, one-third for his drink and one-third for his breath.

(Sunan Ibn Majah 3349)

This beautiful teaching encourages us to avoid overeating and to develop mindful eating habits. Islam teaches us not merely to eat, but to eat with moderation, discipline and gratitude.

The Prophet ﷺ also said:

“Your body has a right over you.” (Sahih al-Bukhari 5199)

This reminds us that taking care of our health is also a responsibility. Maintaining a healthy weight, eating nutritious food, staying physically active, getting adequate rest and avoiding harmful habits are all important parts of taking care of the trust that Allah has given us.

Let us turn these teachings into habits

A healthy lifestyle does not develop overnight. It is built through small, consistent actions—walking regularly, eating wisely, drinking sufficient water, avoiding unnecessary overeating, sleeping well and maintaining an active routine.

Bhatkal Community Jeddah has brought you a beautiful opportunity to put these principles into practice through the Healthy Lifestyle Challenge.

Let us take this challenge not simply as a competition, but as an opportunity to develop healthy habits, self-discipline and a balanced lifestyle—habits that can benefit us, Insha Allah, for many years to come.

Let us make a healthy lifestyle a part of our daily Sunnah-inspired routine.

Join the challenge. Build the habit. Transform your life.

7 PRINCIPLES TO CARRY THROUGH THE 90 DAYS

- 1. Moderation** Eat enough to nourish the body without habitual excess.
- 2. Consistency** Small, good actions repeated regularly are powerful.
- 3. Cleanliness** Maintain personal, food and environmental hygiene.
- 4. Gratitude** Appreciate food, health, family and the ability to move.
- 5. Self-control** Practice restraint around cravings, excess and unnecessary consumption.
- 6. Rest & routine** Protect sleep and structure the day with purposeful routines.
- 7. Community** Encourage one another toward what is beneficial.

“The most beloved deeds to Allah are those that are most consistent, even if they are small.”

Sahih al-Bukhari 6464; Sahih Muslim 783

OUR SCOPE & OBJECTIVE

THE 90-DAY PURPOSE

The BCJ challenge creates a simple framework for members to practice healthier routines over 90 days. Each week introduces or reinforces one behavior. The aim is to make healthy choices more automatic and sustainable.

By Day 90, we hope participants will:

- Drink water regularly and reduce sugary beverages.
- Move more during normal daily life.
- Prepare and eat more meals at home.
- Include vegetables more consistently.
- Develop a healthier evening eating routine.
- Protect sleep and reduce late-night screen exposure.
- Use simple breathing, reflection and calm-time practices.
- Understand portions and calories without following a crash diet.
- Continue the strongest habits beyond the program.

BUILD A BALANCED PLATE

You do not need to ban rice, bread, biryani, mandi, dosa or other familiar foods. The more sustainable approach is to improve portion, balance and frequency.

A SIMPLE MAIN- MEAL GUIDIE

½ Plate Vegetables & Salad | ¼ Plate Protein | ¼ Plate Rice/Bread

Helpful habits

- Start with vegetables or salad when available.
- Include a protein source such as fish, chicken, eggs, beans, lentils or yogurt.
- Keep high-calorie sauces, fried sides and sugary drinks occasionally.
- Eat slowly enough to notice fullness.
- A second serving is a choice - not an automatic routine.

BALANCE > RESTRICTION. CONSISTENCY > PERFECTION.

THE 90 DAYS WILL END. THE HEALTHY HABITS SHOULD CONTINUE.

YOUR 12-WEEK CHALLENGE

Weeks 10-12 are repeat weeks: the goal is to practice the habits together, so they become part of normal life.

Week	Lifestyle Challenge
Week 1	Drink 2-3 L of water daily (or an age-appropriate/personal goal).
Week 2	Hit 8,000-10,000 steps daily.
Week 3	Cook all meals at home - no restaurant food.
Week 4	No sugary drinks & Dessert (Sweet Dishes)
Week 5	Eat vegetables with every main meal.
Week 6	No eating after 8 PM.
Week 7	Sleep at least 7-8 hours per night.
Week 8	10 minutes of daily mindfulness, reflection or breathing exercise.
Week 9	Limit screen time before bed for better sleep.
Week 10	Repeat all challenges together (Weeks 1-9).
Week 11	Repeat all challenges together (Weeks 1-9).
Week 12	Repeat all challenges together (Weeks 1-9).

KNOW YOUR NUMBERS

Track progress without allowing one number to define success. Energy, sleep, consistency, mobility and healthier routines also matter.

Measurement	AT THE START OF CHALLENGE
Weight (kg)	
Waist (cm)	
BMI	
Blood pressure	
Blood sugar*	
Average daily steps	
Average sleep (hours)	

MY WEEKLY HABIT TRACKER

Photocopy or photograph this page and reuse it each week. Tick what you complete. A missed day is not a failed week.

Habit	Sat	Sun	Mon	Tue	Wed	Thu	Fri
Water goal	☐	☐	☐	☐	☐	☐	☐
Daily steps / movement	☐	☐	☐	☐	☐	☐	☐
Home-prepared meals	☐	☐	☐	☐	☐	☐	☐
No sugary drinks	☐	☐	☐	☐	☐	☐	☐
Vegetables with main meals	☐	☐	☐	☐	☐	☐	☐
No eating after 8 PM*	☐	☐	☐	☐	☐	☐	☐
7-8 hours sleep	☐	☐	☐	☐	☐	☐	☐
10 min calm/reflection	☐	☐	☐	☐	☐	☐	☐
Screen-free before bed	☐	☐	☐	☐	☐	☐	☐

*Adapt timing where work schedules, age, pregnancy, medical conditions or professional advice require a different routine.

SMALL CHANGES, BIG DIFFERENCE

Healthy living becomes easier when we replace habits instead of simply banning food or activities.

Instead of...	Try more often...
Sugary soft drink	Water / unsweetened drink
Large rice portion	Smaller rice portion + vegetables
Fried chicken	Grilled / baked chicken
Chips	Fruit / small portion of nuts
Daily dessert	Fruit / yogurt; dessert less often
Elevator for 1-2 floors	Stairs when practical
Sitting after dinner	10-20 minute walk
Late heavy meal	Earlier, lighter dinner
Phone in bed	Screen-free wind-down routine

The words “TRY MORE OFTEN” matter. This challenge is about a sustainable pattern, not rigid perfection.

BCJ CALORIE GUIDE

Bhatkal • Navayathi • Everyday Indian Foods Rice, Breads & Breakfast

Food	Typical Portion	Approx. Calories
Plain cooked rice	1 cup / 160 g	200–220 kcal
Bhatkali/Navayathi chicken biryani	1 medium plate	650–850 kcal
Bhatkali/Navayathi mutton biryani	1 medium plate	750–950 kcal
Chicken pulao	1 medium plate	550–700 kcal
Khichdi	1 bowl	250–350 kcal
Rice + fish curry	1 serving	400–550 kcal
Rice + chicken curry	1 serving	450–600 kcal
Rice + dal	1 serving	350–450 kcal
Chapati / roti	1 medium	100–120 kcal
Paratha	1 medium	250–320 kcal
Dosa, plain	1 medium	130–180 kcal
Masala dosa	1 medium	350–450 kcal
Idli	1 piece	55–70 kcal
Upma	1 cup	220–300 kcal
Poha	1 cup	200–250 kcal
Puri	1 medium	100–130 kcal

Curries, Meat & Seafood

Food	Typical Portion	Approx. Calories
Fish curry	1 medium bowl	180–280 kcal
Fried fish	1 medium piece	200–300 kcal
Chicken curry	1 medium bowl	250–350 kcal
Mutton curry	1 medium bowl	300–450 kcal
Grilled chicken	100 g	170–220 kcal
Fried chicken	1 medium piece	250–350 kcal
Prawn curry	1 medium bowl	200–300 kcal
Dal	1 medium bowl	180–250 kcal
Vegetable curry	1 medium bowl	120–220 kcal
Egg, boiled	1 large	70–80 kcal
Egg omelette	2 eggs	180–250 kcal

BCJ TIP: Keep traditional foods. Control portions, reduce excess oil, add vegetables/salad and choose water.

KNOW THE HIDDEN CALORIES

Snacks • Sweets • Drinks • Everyday Ingredients

Popular Snacks & Sweets

Food	Typical Portion	Approx. Calories
Samosa	1 medium	180–250 kcal
Pakora / bhaji	3–4 pieces	200–300 kcal
Cutlet	1 medium	150–220 kcal
Fried banana	1 serving	200–300 kcal
Banana	1 medium	100–110 kcal
Dates	3 small	60–70 kcal
Gulab jamun	1 piece	150–180 kcal
Jalebi	1 medium	120–160 kcal
Kheer / payasam	1 small bowl	200–300 kcal
Halwa	½ cup	250–350 kcal
Laddu	1 medium	180–250 kcal
Ice cream	1 scoop	130–180 kcal

Tea, Drinks & Additions

Food	Typical Portion	Approx. Calories
Tea + milk + sugar	1 cup	70–100 kcal
Tea without sugar	1 cup	25–40 kcal
Black tea without sugar	1 cup	~2 kcal
Coffee + milk + sugar	1 cup	80–120 kcal
Soft drink	330 ml	130–150 kcal
Packaged fruit juice	250 ml	110–150 kcal
Fresh orange juice	250 ml	100–120 kcal
Sweet lassi	250 ml	200–300 kcal
Buttermilk, unsweetened	250 ml	50–80 kcal
Sugar	1 teaspoon	16 kcal
Oil / ghee	1 tablespoon	~120 kcal
Coconut milk	100 ml	150–230 kcal
Coconut, grated	¼ cup	~90 kcal
Cashew nuts	10 pieces	~90 kcal
Almonds	10 pieces	~70 kcal

Easy Calories to Reduce

Food	Typical Portion	Approx. Calories
3 cups sweet tea / day	—	210–300 kcal
1 soft drink	—	~140 kcal
2 tbsp extra oil / ghee	—	~240 kcal
1 samosa	—	~200 kcal

SIMPLE PLATE RULE: ½ vegetables/salad + ¼ protein + ¼ rice/roti. Choose water more often.

“Eat and drink, but do not be excessive.” — Qur'an 7:31

Calories are approximate and vary by recipe, portion, coconut, oil/ghee and sugar. For portion awareness, not calorie obsession.

EAT SMART — FRUITS & LOWER-CALORIE COOKING

Keep the food you enjoy • Improve the cooking method • Watch the portion

SAME FOOD, FEWER CALORIES

Instead of	Try this	Possible kcal saved*
Deep-fried fish/chicken	Grill, bake or air-fry	100–250
Vegetables cooked in generous oil	Steam or sauté with measured oil	80–200
2 tbsp oil/ghee	Use 1 tbsp	~120
Full-fat coconut-milk gravy	Use less coconut milk + water/stock	50–150+
Oil/ghee-heavy paratha	Dry/light-oil tawa cooking	50–120
Fried papad	Roast/microwave	30–60
Fried egg	Boiled/poached	30–80
Omelette with 1 tbsp oil	Non-stick pan + 1 tsp oil	~80
French fries	Air-fried/baked potato	100–200
Creamy curry	Tomato/onion/yogurt-based gravy	50–150+

FRUIT CALORIE GUIDE

Fruit	Serving	kcal
Watermelon	1 cup	45
Strawberries	1 cup	45–50
Papaya	1 cup	55–65
Orange	1 medium	60–70
Kiwi	1 medium	40–50
Apple	1 medium	90–100
Guava	1 medium	60–80
Pineapple	1 cup	80–85

Fruit	Serving	kcal
Banana	1 medium	100–110
Mango	1 cup sliced	95–110
Grapes	1 cup	100–105
Pomegranate	½ cup seeds	70–75
Small dates	3	60–75
Medjool date	1 large	60–70
Avocado	½ medium	120–160

BCJ SMART EATING TIPS

MEASURE, DON'T POUR oil/ghee • Grill, bake, air-fry or steam more often • Reduce, don't remove, traditional ingredients • Use spices, herbs, ginger, garlic and tomato for flavour • Choose whole fruit more often than fruit juice.

EAT THE FRUIT — DON'T DRINK THE FRUIT

Whole fruit provides fibre and is usually more filling than juice.

**Calorie values and savings are approximate. Recipes, fruit size, oil/ghee, coconut, sugar and portion sizes can change the numbers significantly.*

HOW MANY CALORIES DO I NEED?

Simple Daily Calorie Guide for Adults

There is no single calorie target for everyone. Daily needs vary with age, sex, body size and activity level. Use this table only as a general guide.

Age	Sex	Sedentary	Moderately Active	Active
19–30	Female	1,800–2,000	2,000–2,200	2,400
19–30	Male	2,400–2,600	2,600–2,800	3,000
31–50	Female	1,800	2,000	2,200
31–50	Male	2,200–2,400	2,400–2,600	2,800–3,000
51–60	Female	1,600	1,800	2,200
51–60	Male	2,200	2,400	2,600–2,800
61+	Female	1,600	1,800	2,000
61+	Male	2,000	2,200–2,400	2,400–2,600

WHAT DOES ACTIVITY LEVEL MEAN?

Sedentary: Mostly normal daily activities with little additional exercise.

Moderately active: Normal daily activities plus roughly 30–60 minutes of moderate movement/walking on most days.

Active: A physically active lifestyle or regular exercise beyond normal daily activity.

GENERAL ADULT RANGE

Women: about 1,600–2,400 kcal/day • Men: about 2,000–3,000 kcal/day

BCJ HEALTHY LIFESTYLE MESSAGE

The goal is not to eat as little as possible. Focus on sensible portions, nutritious food, fewer sugary drinks and fried foods, regular movement and sustainable habits.

“Eat and drink, but do not be excessive.” — Qur’an 7:31

Important: These are approximate maintenance-calorie ranges for generally healthy adults. Individual needs can be higher or lower. Pregnancy, breastfeeding, medical conditions, medications, athletic training and weight-management goals may require individualized professional advice. Children and teenagers should not use this adult table for calorie restriction.

HOW MANY CALORIES DO I BURN?

Simple Activity Guide • Approximate Values for a 70 kg Adult

Calories burned vary with body weight, speed, intensity, fitness and duration. Use these figures as practical estimates, not exact measurements.

Activity	30 min kcal	60 min kcal
Slow walking – ~3 km/h	80–100	160–200
Normal walking – 4–5 km/h	110–140	220–280
Brisk walking – 5.5–6.5 km/h	140–190	280–380
Treadmill walking – moderate	120–180	240–360
Treadmill brisk / incline walking	180–280	360–560
Light exercise / stretching	70–110	140–220
Moderate exercise / aerobics	150–220	300–440
Cycling – leisurely	120–180	240–360
Cycling – moderate	200–280	400–560
Stationary bicycle – moderate	180–250	360–500

Stair climbing	220–300	440–600
Swimming – moderate	180–250	360–500
Jogging	250–350	500–700
Household cleaning	80–130	160–260

10,000 STEPS — A USEFUL REFERENCE

For many adults, 10,000 steps may burn roughly 300–500 kcal.
Actual burn varies with weight, pace, terrain and stride.

BODY WEIGHT MAKES A DIFFERENCE

Approximate calories burned during 60 minutes of brisk walking:

Body Weight	Approx. Calories
50 kg	200–270 kcal
60 kg	240–320 kcal
70 kg	280–380 kcal
80 kg	320–430 kcal
90 kg	360–490 kcal
100 kg	400–540 kcal

BCJ HEALTHY LIFESTYLE MESSAGE

Do not exercise only to “burn off” food. Walk and exercise to strengthen your heart, muscles and mobility, improve fitness and sleep, and support long-term health. Calorie burning is an additional benefit.

Note: Fitness trackers, watches and exercise machines provide estimates and may over- or underestimate calorie expenditure

Particularly relevant for Bhatkali/Navayathi cooking

There are **four ingredients worth watching** because relatively small quantities can add substantial calories:

Oil/ghee: approximately **120 kcal per tablespoon**. This is probably the easiest place to reduce calories without reducing the amount of food on the plate. Use a measuring spoon rather than pouring directly from the bottle.

Coconut: nutritious, but calorie dense. Instead of eliminating coconut from traditional recipes, use a little less coconut/coconut milk and build flavour with onion, tomato, chilli, coriander, garlic, ginger and spices.

Rice: rather than making the meal smaller, increase vegetables and lean protein alongside a sensible rice portion. For biryani, reducing added oil/ghee and using leaner meat can lower calories while keeping a satisfying serving.

Frying: fish, chicken and snacks absorb additional fat during frying. Grilling, baking or air-frying can preserve much of the flavour while substantially reducing added oil.

A very simple BCJ cooking formula

MEASURE • DON'T POUR oil and ghee

GRILL • BAKE • AIR-FRY • STEAM more often

REDUCE, DON'T REMOVE coconut and traditional ingredients

USE SPICES FOR FLAVOUR, not extra fat

KEEP THE FOOD — CHANGE THE COOKING METHOD

HEALTH & SAFETY NOTES

This booklet is a community wellness guide, not individualized medical advice. Healthy targets differ between people.

Please adapt to the challenge and seek professional advice when appropriate if you:

- are pregnant or breastfeeding;
- are a child or adolescents;
- are an older adult with mobility or nutrition concerns;
- have diabetes, kidney, heart or blood-pressure conditions;
- take medicines affected by food, fluids or fasting;
- have been advised to restrict fluids, sodium, activity or meal timing;
- develop dizziness, chest pain, unusual shortness of breath, fainting or other concerning symptoms.

Important challenge adaptations

Water: 2-3 L is a general challenge target for suitable adults, not a universal prescription.

Needs vary.

Steps: 8,000-10,000 is a motivational target; build gradually and adapt to ability.

8 PM rule: the goal is to reduce habitual late-night eating, not to override medical, work-shift or age-specific needs.

Sleep: sleep needs vary by age; children and teenagers generally require more than adults.

HEALTHY LIVING IS NOT A 90-DAY CHALLENGE.

IT IS A LIFETIME COMMITMENT.

Small Steps Today • Big Changes Tomorrow

May Allah grant us health, balance, discipline and the ability to use our wellbeing in beneficial ways.

Healthy You • Healthy Family • Stronger BCJ Community
